NoteBook Share

1. Introduction

The main objective of this project is to design an dynamic & fully responsive website using MERN for Digital Notebook sharing between friends and others . This website many people can edit, view and share own notebook to others easily.

2. Expected List of Features

1. User can categorized there notebooks in public and private share mode
2. User can see recommended notebooks by others users
3. User can edit, view and delete own notebook
4. User can choose between dark and light background
5. User can invite others to edit own notes

3. Market Survey

There are many, many websites and apps concerned with sharing your notebook online.Some even handle routines pretty well. Well known players in this arena include online Notebook, zoho Notebook , Moleskine, AWW Board and Remarkable - they each have feature-rich websites and cross-platform apps.

NoteBook share is a notebook sharing website: accessible from any browser, on any device - focused only on creating and developing your ideal virtual notebook See the table below for a comparison some notable market competitors.

No	Name	Pros	Cons	URL
1	Online Notebook	Featured like without sign in u can create note	Mobile website not responsive	https://onlinenotebook.net/
2	Zoho Notebook	Fully Featured	Pricing Very high	https://www.zoho.com/notebook/notebook-for-web.html
3	Moleskine	Featured like smart planners	Loading speed slow	https://us.moleskine.com/moleskine-plus
4	AWW Board	Featured like drawing	But very costly	https://awwapp.com/
5	Remarkable	Features like convert handwriting into text	But design not good	https://remarkable.com/
